What is a screw-type air compressor?

Screw-type air compressor structure of a unique design, a compact, stylish appearance, high efficiency, small energy consumption, low noise characteristics and long life, is a smart environment-friendly product. It is widely applied in metallurgy, machinery, chemicals, and mining, and electric power industries of the ideal gas source equipment.

What is a screw air compressor?

Air compressor is modular in design, screw rotor, oil and gas separation extinguishers, coolers, are installed in a motor, within the framework of acoustic enclosures through the noise of rubber materials. Screw air compressor is the main components of screw head, the separation of oil and gas cylinder.

What is included in the KRSD series rotary screw air compressor manual?

This manual describes the safety precautions, structure, and functions of all systems and components, as well as the operation and maintenance methods for the KRSD series rotary screw air compressors. The owner and operator shall read the manual carefully. Only after thorough understanding should the machine be operated for the first time.

How to check if a compressor is working properly?

2? Press the 'start' button, the compressor can be work according to the set mode. At this time, observe whether normal of the display panel, pressure temperature, or abnormal sound, oil leakage. If there is abnormal, stop and check immediately. 3? When press the 'stop' button, the machine will stop after finishing unloading. It is normal

Does Kaishan compressor provide maintenance service for KRSD series rotary screw compressors?

Kaishan Compressor's authorized distributors provide maintenance service for KRSD series rotary screw compressors. A certified technician is required to ensure compressors maintenance is safely handled. By following the instructions in this manual, the user will minimize possibility of an accident throughout the useful life of this equipment.

3? Stop: click 'OFF (O)' on the panel, air compressor will automatically stop after unload for some times. When do not use the machine, cut off the power and close the valve of the supply ...
