the ice on the moon is not deep enough for a real drilling rig, imo. if all you are wanting it for is ice, i would probably use a rover, with a drill that folds down from a hinge and scrapes the surface.

A normal flying drill ship is the most effective to mine on planets. Lot of downward and forward thrusters, clear out the surface using right click mining, then go ...

I wouldn't bother taking a flyer in. Even if you drill the walls out, the flyer will still need to dig into the ground and you end up with the same problem. Let us know how the ...

Once you have the materials, I would suggest building a drilling rig ship. Basically, a platform with a hole in the middle and enough engines to stay aloft. you put ...
